

## Welcome to the 2nd edition of the ILS Newsletter

### The Good Oil

ILS welcomes you to the 2nd Edition of our Newsletter and to Alert Level 2. Recent weeks have been challenging for everyone but as a New Zealand owned and operated business, we at ILS are proud of what our team of 5 million have been able to achieve in controlling the spread of Covid 19 - well done to all!

We now need to look towards the future and ILS are here to support you in getting back to business.

To discuss your ideal lubricant solution or if you have any questions or concerns please dont hesitate to contact your local ILS Area Sales Manager or our Customer Service team.

**ADAPT TO SUCCEED**  
WITH CASTROL® VECTON®

IT'S MORE THAN JUST OIL. IT'S LIQUID ENGINEERING.  
**Castrol**  
**VECTON**  
www.castrol.com/vectonusa

certified carbon neutral product  
castrol.com/carbonneutral

Castrol® VECTON® is the world's first certified carbon-neutral commercial vehicle engine oil. Featuring the extra performance reserve delivered by System Pro Technology™, it adapts to engine conditions and maximizes oil drain intervals.

## ILS Product Spotlight Castrol VECTON Diesel Engine Oils

Modern diesel engines use new technologies to make as much as 30% higher torque, but that also brings higher engine temperatures and pressures. This can lead to accelerated oxidation and oil thickening, increased build-up of deposits, and rapid depletion of the oil's acid-controlling reserves. All of which pushes the oil closer to breakdown and reduces useful oil life. Castrol has developed VECTON with new System Pro Technology™, which has an extra performance reserve that fights oil breakdown by helping to control oxidation, reduce deposits, neutralise harmful acids and also adapt to higher temperatures, maintaining viscosity. The Castrol VECTON range\* performed, on average, 45% better than API and ACEA test limits, demonstrating that Castrol VECTON with System Pro Technology™ delivers an extra performance reserve to give you the confidence in your maximum drain interval. Castrol VECTON delivers another important benefit to environmentally aware business owners. Castrol VECTON is the first certified carbon neutral commercial vehicle engine oil on the market. So at the same time you're maximising drain intervals, you'll reduce your business's carbon footprint, reduce your impact on climate change, and make a positive impact on the environment. All in all it definitely means a Competitive Edge for your business.

\* Based on tests conducted on 81% of the whole Castrol VECTON range by volume based on 12 month sales.

## Industrial Solutions Oilsafe - The Leader in Visual Lubrication Systems

For more than a decade, OILSAFE has been the oil transfer management system preferred by leading companies around the world. People often go to great lengths to preserve the quality of their oil only to contaminate it by using filthy containers, pouring it through a dirty funnel or inadvertently mixing it with different oil.

The colour coded range of OILSAFE containers provide:

- A fully sealed unit that prevents contaminants from getting into the oil.
- Easier dispensing without the need for secondary tools such as funnels.

By colour coding your lubricants and integrating with our OILSAFE identification products you'll prevent cross contamination and misapplication of oils. With different lid types designed to fit the various drum sizes, you can mix and match the components to build heavy duty

durable containers that will meet your oil transfer requirements. This portfolio of products combine to form the revolutionary Visual Lubrication System that:

- **Protects lubricants from contamination.**
- **Reduces machinery downtime.**
- **Minimizes dangerous and costly spills.**

*"If an organization does not recognize that a well performed lubrication task is fundamental to the continued operations of the plant and its ability to achieve its mission, it is on a path to trouble. The role of maintenance is not the repair of equipment once it has already failed; maintenance is the business of keeping the plant up and running, and the most effective way of doing that is preventing failures. Lubrication and oil analysis are at the very heart of maintenance because they deal with elimination and monitoring root causes of failures - particulates, moisture, and the ineffective separation of contacting surfaces." - Adam Davis, Machinery Lubrication Magazine*

## Castrol Motorsport Partners Its Not Just On The Track That Counts!

Formula 1 is the ultimate proving ground. Globally iconic and fiercely contested, it represents the pinnacle of motorsport. It's why manufacturers identify it as the perfect arena to demonstrate technical innovation. This pursuit of excellence is the inspiration behind Castrol's

partnership with Renault F1 Team.

Together they strive to win against the toughest opposition.

The Renault Sport Formula One™ Team choose Castrol Edge to help their car perform on the track. But, behind the scenes, Castrol's high performance metalworking fluids are also vital in the manufacture of the car's precision parts too. Castrol also supplies lubricants to the team's Enstone technical centre and Renault Sport Racing's Viry-Châtillon engine operations base.

Today, Renault's vision is to be the best team in Formula One. It's a vision that's shared at Castrol – and a journey we are very proud to be part of. Watch the video at

<https://www.youtube.com/watch?v=bPiYEU86DzE> and take a look at Castrol's relationship with the Renault Sport Formula One™ Team and the role our Industrial products play in helping them achieve the world championship.
